on the are as available, to calculate and manage the attendance of visitors to the system based on the above indices.

For swimming pools for special care, rehabilitation and thermal uses, as well as for swimming pools inserted in theme parks or accommodation facilities, bathing establishments or restaurants where swimming activities are not permitted, the provisions for thermal swimming pools are applied in the specific sheet . For these pools, if swimming is not allowed, it is sufficient to calculate an index of 4 square meters of water per person. The manager is required, based on the are as available, to calculate and manage the revenue of visitors to the facility. For swimming pools for collective use inserted in structures already used primarily for other accommodation activities, the provisions provided for must be properly screened and modulated in relation to the context, the type of pools, the customer flow.
