FONDAZIONE SCIENZA E TECNICA - THE PLANETARIUM

<http://www.fstfirenze.it/planetarium/?lang=en>

A ideal place for kids who want to learn and comprehend more about celestial phenomena.

You can travel across the space thanks to the 3D Map of the Universe just like you were on a spaceship, reaching nebulae, galaxies and planetary systems.

PALAZZO VECCHIO - CHILDREN'S MUSEUM

It is not easy to introduce the little ones to the charm of history, often perceived as a succession of dates and names. In a constant confrontation with today's life, children are welcomed by the mercy of the little princes that accompanies them through the rooms of the Palace to the rediscovery of the daily life of a very particular family, the ducal one. The path ends with the meeting of Duchess Eleonora of Toledo who will converse with the childrens and who, for the little guests, will be confused with a fairytale princess.

FONTANA DEL PORCELLINO

Admire and rub its nose for good fortune. Some of us even placed a coin in its mouth and let it slip hoping it would fall in between the grates and fulfill our wishes. But the story of "Porcellino" represents much more than just a lucky charm. Il Porcellino is a Florentine nickname for the beautiful bronze fountain of a boar, sculpted and casted by maestro Pietro Tacca, commissioned by Cosimo II of Medici in 1612. Come and discover IL Porcellino story and some particular legends around him.

GALILEO THE GENIUS

<https://www.museogalileo.it/en/>

The Galileo Museum preserves an important collection of tools designed and made by Galileo Galilei and the scientific collections of the Medici and Lorraine families. Visiting the museum, you will find yourself in front of over a thousand instruments and scientific equipment which will take you on a journey into the past, from the sixteenth to the eighteenth centuries.

LEONARDO DA VINCI MUSEUM

<http://www.museoleonardodavincifirenze.com/home.html>

The museum houses the reconstructions of various civil, military and flight engineering projects developed by the Renaissance genius, some of which were found in the famous Leonardo Codices. Several machines in the museum itinerary are interactive and this is undoubtedly the most fun aspect for children, even small ones who can directly experience the functioning of the reproductions.

THE NATURAL HISTORY MUSEUM

<https://www.msn.unifi.it/changelang-eng.html>

It consists of 6 separate sections located in different locations but all are still in the historical center. One of the most interesting is the Geology and Paleontology Section, you will see a large number of fossils from Italy (and beyond) tracing the evolution of life on earth from the most ancient remains of 3.5 billion years ago. You and your children will be impressed by the collection of skeletons of fossils found in the Valdarno area on Tuscany, including the elephant “Pietro”, as he was nicknamed, standing tall at 4 meters high.

PALAZZO STROZZI

<https://www.palazzostrozzi.org/en/>

Adults and children can visit the exhibition in a fully independent way using the Family Kit, a special bag containing games and additional information on the exhibits, or else they can sign up for tours and workshops tailored to cater for different age groups from three upwards. The starting point in each case is the observation of works of art, an activity shared by adults and children alike, accompanied by stories for younger children and by interactive experiments for older ones.
