THE ART OF PAMPALONI SILVER

Pamploni has been one of our world's leading silversmiths since its founding in 1902 in Florence.

Now a fourth-generation family business led by Gianfranco Pampaloni and his daughter, Teodora, the family and their team create unique silver pieces for everyone from the Pope to Tiffany and Dolce and Gabbana. To stroll through the elegant gates of the factory (and former Pampaloni family home) is like entering another world. Display cases are filled with unique, handmade silver treasures, workshops hold machinery that dates back to the thirties, and skilled Florentine artisans hold the precious knowledge of how to smelt, cast, hammer, and polish.

On this visit, you'll hear stories from Pampaloni himself while experiencing his incredible workshop - and secret dining room - on an insiders-only private tour. We are thrilled to share this magical, fourth-generation workshop and slice of Florentine history with guests and friends through The Place of Wonders Foundation.
