SUSTAINABILITY

GREEN ETHOS AND SUSTAINABLE TOURISM

Motivated by a great love for the environment, Baia del Sole constantly works actively to protect the surrounding nature, starting with the meticulous care given to the lush park in which the resort is nestled. A wide variety of Mediterranean plants receive extraordinary care, enhancing their beauty.

NATURAL MATERIALS AND SUSTAINABLE PACKAGING

Respecting the environment involves a commitment to incorporating natural materials, such as terracotta and wood, into many elements of the common areas. Both restaurants specialize in short-chain recipes that follow the seasons, and drinks and cocktails are served in glass to reduce plastic consumption.

The resort's rooms also reflect care in both materials choice and for decreased energy consumption: environmentally sustainable dispensers, plastic-free room amenities, and new linens every three days, unless otherwise requested.
